MARGARET MARY
HEALTH

About your

SISIT BENEFITS

At Margaret Mary Health, we understand life gets hectic. That's why we offer flexibility and convenience when it comes to your and your family's health needs. Through the SISIT health plan, you have access to our primary care providers, immediate care centers and telehealth services. Be sure to present your insurance card with the SISIT symbol to take advantage of the following free services:

- Sick care visits
- Treatment of most chronic conditions
- Disease prevention
- Immunizations
- Prescription management
- Annual wellness visits
- Routine screenings
- Patient education and counseling
- Sports physicals
- Certain lab testing

Prescription benefits will be covered by your Anthem plan. Prescriptions can be filled at an area pharmacy of your choice. Health services not included under the SISIT plan should be submitted under Anthem.

How to use

SISIT TELEHEALTH

As part of your SISIT plan, you have free access to Margaret Mary Health’s telehealth program. Telehealth is a safe and secure way of connecting with a health care provider online. In order to participate in a virtual appointment, you must connect via smartphone from a private location where you feel safe to openly discuss your health. You must also be in the state of Indiana at the time of your appointment.

HOW IT WORKS

- 1 To schedule a telehealth appointment, call **812.933.3770** during weekday business hours.
- 2 Prior to your appointment, visit mmhealth.org/sisit to fill out our consent and medical history forms online. The password is **Enroll**.
- 3 When we receive your completed forms, we will send you an email to enroll in our patient portal. Registering for the patient portal gives you complete access to your medical record, including any test results and visit summaries.
- 4 Your appointment will be scheduled and you will receive a text message at the time of your visit with a link to join.

TYPES OF VISITS

A variety of illnesses and health concerns can effectively be treated via telehealth. However, please be aware it is at the provider’s discretion as to whether or not your condition qualifies for telehealth services. Certain health concerns require in-person treatment. Telehealth is especially effective when treating acute conditions, including:

RESPIRATORY
INFECTIONS

EAR PAIN/
INFECTIONS

SORE
THROAT

RASHES

If you are already established with an MMH provider, you may be able to use telehealth care for follow-up of some chronic conditions. **Telehealth services should never be used if you are experiencing shortness of breath, chest pain or abdominal pain. Please visit your nearest emergency room if you are experiencing these symptoms.**
